Sir:

Applicant hereby requests that the enclosed photographs be accepted as formal drawings with respect to the above-identified application. Attached hereto are three (3) sets of color photographs, Figures 4 and 7, developed on double weight photographic paper, and one set of black and white photocopy that accurately depicts, to the extent possible, the subject matter shown in the color drawings.

Please amend the specification, by inserting the following language as the first paragraph of the specification beginning a brief description of the drawings or photographs (page 4, between lines 1 and 2):

- - The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Patent and Trademark Office upon request and payment of necessary fee. - -

The reason for the need for color drawings or photographs in this application is as follows:

Both the applicant and the assignee have indicated that only in color do Figures 4 and 7 properly present the desired information. As indicated in the specification, color may be used in embodiments of the present invention to represent the directionality of the flow of blood detected by the system. Additionally, the intensity of the color within the color regions of Figures 4 and 7 also may be used to convey additional information concerning the detected blood flow. The use of color and color intensity as described are recited in many of the claimed embodiments of the present invention. These elements cannot be conveyed by the use of black and white photos or drawings. Thus, the use of color in Figures 4 and 7 is necessary to disclose claimed subject matter of the present invention.

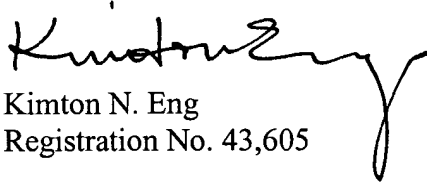

As required by 37 C.F.R. § 1.84 (37 C.F.R. § 1.17(h)), applicants have enclosed herewith a check in the amount of \$635, which amount includes the petition fee of \$130.

Enclosed are 13 sheets of formal drawings, Figures 1-16, including three sets of color photographs, Figures 4 and 7, developed on double weight photographic paper, for filing in the above-identified patent application.

The Commissioner is authorized to charge payment of any fees under 37 C.F.R. §1.17(i) associated with this communication or credit any overpayment to Deposit Account No. 50-1266. This request is being submitted in duplicate.

Respectfully submitted,
